

Larson & Darby Group - Machine Foundations

2009 AIA Northern Illinois Chapter Outstanding Firm of the Year

Alstom Power - Chattanooga, Tennessee

Our structural engineering team has designed foundations for machines all around the world, across a diverse spectrum of industrial applications. From structural foundations for machines that manufacture steam turbines for Alstom Power in Chattanooga, TN to foundations for Boeing's Commercial Airplane Group in Portland, OR and LTV Aircraft Products Group in Dallas, to structural foundations for John Deere Motores in Torreon Coahuila, Mexico, our structural engineering experts have provided cost-effective solutions for heavy industrial machine foundations. Our machine foundations can be seen all across the U.S., England, Germany, Egypt, and Mexico. The process begins with our uncompromising commitment to your quality assurance and the identification of the relative values of time, budget and quality in response to your project program.
